My project 1 is doing square and take photo try to find face

```
1 import easygopigo3 as easy
2 import time
3 import easypicamera
4 raspi_camera = easypicamera.EasyCamera()
5
6 sensor_readings = None
7
8 gpg = easy.EasyGoPiGo()
9
10 photo_count = 1
11 photorun_count = 14
12
13
14 # start
15 easypicamera.create_folder_on_usb('t Photo')
16 raspi_camera.take_photo('photo_folder'+'/'+photo_+str(photorun_count)+'_'+str(photo_count)+'.jpg')
17 photo_count = photo_count + 1
```
